

H₂ Final Filter[®]

Your Pollution Solution[®]

- Protect catalysts, instruments & equipment with the SULFUR MAGNET™
- #1 in CAPACITY in the World because it can remove 55.4% of it's weight of sulfur
- #1 in TENACITY in the World because it reduces H₂S to below 200 ppt (H₂S below the limit of detection)
- The H₂ FINAL FILTER[®] MINI-HT filters pictured are the ideal solution to protect your H₂ Fuel Cell and instruments because they contain the SULFUR MAGNET™ inside the 316L Stainless Steel filter housing
- Available with 6 mm or 1/4" or 1/8" Swagelok compression ends for easy mounting
- Reduces H₂S to below 200 ppt
- Reduces NO_x to below 1 ppm
- Traps and eliminates particles larger than 2 micron (or as you require)
- The SULFUR MAGNET™ guarantees exceptional purity and performance, this is cheap insurance, a very wise investment!

Because YOU
deserve the BEST!
